

Θέμα 4^ο

$$\alpha) \eta = \frac{P}{P_{\varepsilon\iota\sigma}} \Rightarrow \eta = \frac{800}{1000} \Rightarrow \eta = \frac{8}{10} \Rightarrow \eta = 0,8$$

$$\beta) P_{\alpha\pi} = P_{\varepsilon\iota\sigma} - P \Rightarrow P_{\alpha\pi} = 1000 - 800 \Rightarrow P_{\alpha\pi} = 200 \text{ W}$$
